**Introducing the Fast Box.
Now you see it.**

Now you don't.

The next time you see a VW Station Wagon on the road, you'd better not blink.

It just may be one of our new Fast Boxes.

The Fast Box comes with 32% more power.

It goes 10 miles an hour faster.

It bravely climbs the most menacing hills.

It passes other cars without a second thought.

And, as if that weren't enough, the VW Station Wagon

also has 38 other improvements. Giving you a Wagon that's quieter. Sturdier. Easier to shift. And easier to stop.

It's still economical. And has nearly twice as much space as you'd find in most conventional station wagons.

In fact, it has a lot of the features you're enjoying right now. Plus some you're not.

So come in and test drive the Fast Box.

And see how it feels to be in the passing lane for a change.
