# VW Campmobile.

## For people who believe a family's car should be it's castle.

Maybe we shouldn't even call it the Campmobile. After all, more times than not, people use it as a passenger car. Or for hauling things that are far too big to fit into ordinary family cars.

And when you're away from home, camping in our Campmobile is really much too comfortable to call it camping. All the luxuries are there—even the kitchen sink and a spot for plugging in your TV.

As for driving, there's a powerful 2-liter fuel injected engine, roller-type steering, power-assisted disc/drum brakes, and even an electric rear window defogger.

While our Campmobile is a parkable and maneuverable 177.4" long, it can sleep five with the optional pop-up top—even when four of the five are adults.

One more thing. Besides saving on motel bills, our Campmobile also saves on gas bills. E.P.A. estimates\* indicate it gets 26 mpg highway, 16 mpg city.

Good gas mileage for a family's car. Spectacular for a family's castle.
